

BIOGRAPHIES

GARY TAYLOR received a B.Sc. in geology from The University of Calgary in 1975. He has worked in various positions in geophysics at Shell Canada Resources and Canadian Superior Oil. His current area of interest is in developing geophysical applications to hydrocarbon reservoir evaluation in western Canada. He is a member of the CSEG and SEG and the EAEG.

RON M. CLOWES received his B.Sc. (Honours Physics) in 1964 from the University of Alberta, Edmonton. He continued with graduate work at the same institution, obtaining his M.Sc. (Geophysics) in 1966 and Ph.D. (Geophysics) in 1969. His graduate work concerned detailed study of the crust of southern Alberta using the seismic reflection technique.

From 1969 to 1970 he was an Honorary Research Fellow at the Australian National University, Canberra while he held a National Research Council (Canada) Postdoctorate Fellowship. In 1970 he joined the faculty at the Department of Geophysics and Astronomy, University of British Columbia, Vancouver where he is currently a professor. During 1979-80, he was a visiting associate professor at the Institute for Geophysics, Copenhagen University and the Laboratory for Geophysics, Aarhus University, both in Denmark. His current research centres on reflection/refraction seismology, using explosive and airgun sources on land and at sea for crustal/upper mantle investigations, and the relationship of the seismic results to geological and tectonic processes. Dr. Clowes received the CSEG Best Paper Award in 1966 and 1981, and with his co-authors was awarded the 1968 SEG Best Paper Award for papers published in

Geophysics. He is a member of the CSEG, SEG, CGU, GAC, AGU and SSA.

A.G. GREEN received a B.Sc. degree in physics from the University of Hull (U.K.) in 1969 and a Ph.D. degree in geophysics from the University of Newcastle (U.K.) in 1973. During 1973-74 he was a National Research Council of Canada Postdoctoral Fellow at the Division of Seismology and Geomagnetism, Earth Physics Branch, Department of Energy, Mines and Resources in Ottawa. From 1974 to 1979 he was assistant professor of geophysics at the University of Manitoba.

In 1979 he returned to the Division of Seismology and Geomagnetism as a research scientist, and since 1982 he has been head of the Earth Structure Section there. He is a member of the SEG, CGU and GAC.

DAN HAMPSON is currently vice-president of research and seismic programming at Veritas Software Ltd. He has been with the Veritas organization since 1976 and has been involved primarily with seismic research. His background also involves working as an applications geophysicist with Phillips Petroleum in Houston.

Dan received his B.Sc. in physics from Loyola College in Montreal in 1971, and his M.Sc. in theoretical physics from McMaster University, Hamilton in 1973. In 1981, he received the Best Paper Award for a paper delivered at the CSEG convention. Dan is a member of the CSEG, SEG, EAEG, and APEGGA and is currently editor of the CSEG Journal.

BRIAN RUSSELL is currently vice-president of training and technical marketing for Veritas Software Ltd. He has been with the Veritas organization since 1981 and has been actively involved in seismic research and training.

Before joining Veritas, Brian worked with Teknica Resource Development as a senior geophysicist and also with Chevron in both Calgary and Houston. With Chevron, Brian was involved in seismic acquisition, processing and interpretation and also in seismic computer applications.

Brian Russell holds a B.Sc. (Honours) in geophysics from the University of Saskatchewan and also a M.Sc. in geophysics at the University of Durham, England. Brian has authored or co-authored a number of geophysical papers and has given seismic courses to Dome Petroleum, Canterra Energy and The University of Calgary. He is registered as a professional geophysicist with APEGGA and is also a member of the SEG, CSEG and EAEG.

DR. A. EASTON WREN received his B.Sc. (Hons.) degree in geology in 1960 and his Ph.D. in geophysics in 1968 from the University of Glasgow, Scotland. His professional experience includes positions with Ray Geophysical in Libya, the United Nations in Uganda, Amoco Canada Petroleum Co. Ltd. and PanCanadian Petroleum. He is currently President of

Petrel Consultants Ltd. in Calgary, a company he founded in 1978.

Dr. Wren is a member of SEG, EAEG, CSEG, CSPG, APEGGA and the Geological Society of Glasgow. He has published several papers on seismic processing and interpretation and in 1974 received the Best Paper Award of the CSEG. In 1981 he served as president of the Canadian Society of Exploration Geophysicists and in 1977 received the Meritorious Service Award of that society.

Dr. Wren has been a lecturer for the AAPG Continuing Education Program, and is currently a member of the SEG Continuing Education Committee as well as a teaching associate with GeoQuest International, Inc.
