

# CANADIAN JOURNAL OF EXPLORATION GEOPHYSICS

VOL. 24, NO. 1      JUNE, 1988

Continuation of:  
The JOURNAL OF THE CANADIAN SOCIETY OF EXPLORATION GEOPHYSICISTS

**Computation of *SH* synthetic seismograms along horizontal and vertical profiles by the Alekseev-Mikhailenko method,**  
*L.J. Pascoe, F. Hron and P.F. Daley*    7

**Practical and efficient ray tracing in two-dimensional media for rapid traveltime and amplitude forward modelling,**  
*C.A. Zelt and R.M. Ellis*    16

**S-wave velocity and Poisson's ratio from shear waves observed in normal P-wave data in an offshore basin,**  
*S. Jain*    32

**Extended basement beneath the intracratonic rifted basins of the Grand Banks of Newfoundland,**  
*M.E. Enachescu*    48

**A modified current-filament model for use in the interpretation of frequency-domain electromagnetic data,**  
*K. Duckworth*    66

**The influence of a conductor with multiple grounds on apparent resistivity surveys,**  
*R.H. Johnston, F.N. Trofimenkoff and J.W. Haslett*    72

# CANADIAN JOURNAL OF EXPLORATION GEOPHYSICS

VOL. 24, No. 1  
June, 1988

## EDITOR

**R. JAMES BROWN**, DEPT. OF GEOLOGY & GEOPHYSICS, UNIVERSITY OF CALGARY, CALGARY, ALBERTA T2N 1N4

## BUSINESS EDITOR

**JEFFREY T. KARY**, KARY DATA CONSULTANTS LTD., 2050, 633 - 6TH AVE. S.W., CALGARY, ALBERTA T2P 2Y5

## PRODUCTION EDITOR

**CECELIA FREY**, 6228 TOUCHWOOD DRIVE N.W., CALGARY, ALBERTA T2K 3L9

## ASSOCIATE EDITORS

**Melvyn E. Best**  
Bedford Inst. of Oceanography  
Atlantic Geoscience Centre  
P.O. Box 1006  
Dartmouth, Nova Scotia B2Y 4A2

**Harold W. Dosso**  
Dept. of Physics  
University of Victoria  
Victoria, British Columbia  
V8W 2Y2

**Zoltan Hajnal**  
Dept. of Geological Sciences  
University of Saskatchewan  
Saskatoon, Saskatchewan  
S7N 0W0

**Edward G. Lalonde**  
Home Oil Co. Ltd.  
324 - 8th Avenue S.W.  
Calgary, Alberta  
T2P 2Z5

**Woolf M. Moon**  
Dept. of Geological Sciences  
University of Manitoba  
Winnipeg, Manitoba  
R3T 2N2

**John W. Peirce**  
Petro-Canada Inc.  
P.O. Box 2844  
Calgary, Alberta  
T2P 3E3

**Brian H. Russell**  
Hampson-Russell Software  
Services Ltd.  
615 - 3rd Avenue S.W.  
Calgary, Alberta T2P 0G6

**Gordon F. West**  
Dept. of Physics

©1988, Canadian Society of Exploration Geophysicists. World rights reserved. Authorization to photocopy items for personal use, or the internal or personal use of specific clients, is granted by the Canadian Society of Exploration Geophysicists, provided that the base fee of \$3.00 per copy is paid directly to the Copyright Clearance Center (CCC), Transactional Reporting Service (TRS), 27 Congress Street, Salem, MA 01970, U.S.A. For those organizations that have been granted a photocopy licence by CCC, a separate system of payment has been arranged. The fee code for users of the TRS is 008-5022/88 \$3.00 + 0.00.

**Submission of Manuscripts** is invited in all areas of geophysics related to exploration. Case histories are particularly welcome.

Manuscripts should be sent, in quadruplicate, directly to the Editor. Papers received by the Editor will be deemed property of the C.S.E.G., unless the release of the paper is granted in writing by the Editor. There are no page charges but additional costs of reproduction (e.g. for colour figures or fold-outs) are charged to authors.

**Instructions** for preparation of the manuscript may be found in "Instructions to Authors" on page 4.

**Short Notes** and discussions of the papers published in the Journal are welcome.

**Responsibility** for all statements and scientific opinions made in the papers lies with their authors.

Only unpublished material should be submitted for publication. The authors are responsible for clearing their papers for publication in the Canadian Journal of Exploration Geophysics from any Society or Journal which may have prior publication rights to the manuscripts.

**Reprints** can be supplied at cost if ordered prior to publication.

**Subscription** to the Journal is included in the membership dues. Nonmembers and organizations should direct their enquiries to the Secretary, C.S.E.G., at the address given below or, by telephone, at (403) 262-0015.

**Advertisements** are welcome. Rates may be obtained by writing to the Business Editor.

**Previous Issues** of the Journal are still available. For prices contact the Secretary.

**Claims** for nonreceipt of Journal should be made within three months of publication.

## INSTRUCTIONS TO AUTHORS

### Editorial standard.

The CANADIAN JOURNAL OF EXPLORATION GEOPHYSICS adopts as its editorial standard the "Instructions to Authors" of the Society of Exploration Geophysicists as published in GEOPHYSICS 52 (Jan. 1987), 1-10, and revised in GEOPHYSICS 53 (Jan. 1988), 1-7. Some augmentation to the SEG Instructions is included below and in cases of ambiguity or conflict the present CSEG Instructions will take precedence.

### Submission of manuscript.

Submit an original and three copies, *i.e.*, four copies in all of each manuscript, complete with figures, tables, references, and figure and table captions. The figures and tables submitted with the original manuscript should be the originals described below in 4. However, it is acceptable to submit four sets of figure/table copies, the originals to be supplied upon acceptance of the paper. Manuscripts should be typed, double-spaced, on 21 $\frac{1}{2}$  x 28 cm (8 $\frac{1}{2}$  x 11 in) paper or on A4 (metric-format) paper.

### Organization of manuscript.

1. Title page. It should give the title, followed by the names, affiliations and full addresses of all the authors. Make the title of your paper as brief as possible. The first word should be a significant one, suitable for both classifying and indexing the paper. If your paper was given orally at a meeting, include a footnote specifying the name of the organization that held the meeting, where held, and the date of presentation.
2. Abstract. An abstract is not an introduction or a list of contents, but is rather a summary of the essential qualities, including the principal conclusions, of the paper. (See the SEG Instructions.) Every technical paper must be accompanied by an abstract of approximately 150 to 300 words. Short notes do not require abstracts.
3. Headings. Normally three levels of headings should be used. First-order headings are centred and capitalized; second-order headings are positioned at the left-hand margin; third-order headings are indented, underlined or italicized, and followed by a dash. Numbering of sections is optional.
4. Figures, tables and formulae. These should be compatible with a 21 $\frac{1}{2}$  x 28 cm page size, two-column format; *i.e.*, they will be reproduced at either 9 cm (half-column) or 18 cm (full-column) width in vertical format or 23 cm wide in horizontal format.

— Figures should be drafted at approximately twice the published size. Any clean figures of good contrast and overall quality are acceptable. However, original artwork, glossy photographs or PMTs, of manuscript-page size, are preferred.

— All figures must be clearly marked on the back with the figure number and author's surname.

— Colour illustrations are encouraged where the use of colour is deemed essential. However, authors will be responsible for the additional costs of colour reproduction.

— Foldouts should be avoided if possible but are encouraged where necessary. Again, however, authors will be billed for any additional costs.

— Original materials will not be returned to authors

unless specifically requested at the time of submission.

— Tables, formulae and equations can be difficult to typeset and proofread. They should be submitted in a form suitable for direct reproduction; for example, laser-printer output is ideal. In such cases authors should follow the Journal's conventions regarding italicization, bold-face type, punctuation, etc.

— Captions for figures and tables should be provided on a separate page or pages of the manuscript; they should not be lettered on the original, nor should a title be designed within the frame of the figure or table. A figure (or table) and its caption should be a self-contained unit which, in its essentials, can be understood without reference to the text.

5. References. This area is the one with the greatest incidence of errors in most papers. Authors are urged to check citations in the text and entries in the References most carefully. The responsibility for correctness lies with the authors. Only references cited in the text should be listed under the heading REFERENCES. References *not* cited in the text, but deemed to be essential, should be grouped separately under the heading REFERENCES FOR GENERAL READING. For further details on the format of references, the SEG Instructions are adhered to with the following exceptions: commas are omitted before the word *and* in a string of authors' names; between journal name and volume number, and after words like *Bull.* and *Proc.* in the name of a publication.

### Units and Spelling.

Physical quantities shall be expressed in SI units. Imperial or CGS equivalents may additionally be given. See R.E. Sheriff's "Encyclopedic Dictionary of Exploration Geophysics" (SEG, 2nd ed., 1984) for a comprehensive guide to SI units, forms of abbreviation, etc. Official Canadian SI spelling (*e.g.*, metre) shall be used. In other cases Canadian spelling is preferred (*e.g.*, centre, modelling, sulphur) although in many instances acceptable alternatives exist. Authors should, above all, be consistent in their spelling.

### Review, Revision, Reprints.

Authors are strongly advised to have their manuscript critically read by at least one reader familiar with the subject matter before it is submitted. All manuscripts submitted to the Journal undergo a standard peer-review process. Galley proofs will be forwarded to authors with a return date specified and with an order form for reprints. If there is more than one author, it must be clearly indicated to whom the proofs are to be sent. At the discretion of the Editor, minor changes (as opposed to corrections) may be accommodated at galley-proof stage. Major revisions at this or at a later stage will be charged to the author. Authors may order reprints in any multiple of fifty and will be billed for them at cost. They should be ordered at this time only; back orders will entail much higher costs.

### Copyright.

The copyright of accepted and published material is reserved by the Canadian Society of Exploration Geophysicists.

**EXECUTIVE COMMITTEE  
FOR YEAR ENDING FEBRUARY 1989**

President:	R.M. (Ralph) Lundberg
First Vice-President:	A.J. (Al) Ferworn
Second Vice-President:	F.E. (Fred) Baker
Secretary:	B.A. (Barbara) McClary
Treasurer:	C.E. (Carol) Fitzgerald
Business Manager:	M.A. (Murray) Olson
Journal Editor:	R.J. (Jim) Brown
Past President:	R.L. (Bob) Comer
Recorder Editor:	R.M. (Rick) Lowe

## PRESIDENT'S PAGE

---

The worth of a technical society is measured, in part, by its publications. While the Recorder, in its new format, has filled the role of newsletter, supplemented by short technical discussions, the backbone publication of the C.S.E.G. is the Journal.

To those members who feel, with Shakespeare, that our Society should present "more matter, with less art", Journal Editor Jim Brown has responded with a second Journal within six months of the last edition. A December 1988 issue is also planned. In conjunction with the production increase, the Journal name is also changing to: Canadian Journal of Exploration Geophysics. This newly named publication is in continuation of the former: Journal of the Canadian Society of Exploration Geophysicists, and volume numbering is consecutive.

The precedent-setting September 1987 conference held in China is recognized in this issue with the publication of abstracts of the interpretation papers presented. Hopefully this is the beginning of a more international flavour to the Journal.

The publication of two Journals in one year is a significant accomplishment. The C.S.E.G. Executive thanks the advertisers who support the Journal, the Authors who have shared their concepts with us and Jim Brown, who together with his energetic Editorial Staff, has made this Journal one which speaks well for our Society.

R.M. Lundberg
